c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The Global Test Cloud Service (GTCS) is a Command and Control (C2) Portfolio cloud environment hosted in the AWS IL6 region that will be used to test C2 software. The GTCS will provide an Infrastructure as a Service (IaaS) solution on which C2 portfolio members can build, integrate, test and scale a variety of services and applications in a cloud environment. The GTCS will implement operation and service strategies based on IT industry and best practices while leveraging Commercial Off the Shelf (COTS) tools and cloud technologies that reduce the costs associated with maintenance and oversight of the infrastructure. The GTCS is a vital part in meeting C2's modernization and software testing objectives. The types of personal information about individuals that is collected includes: Name(s), DoD ID Number, Organization, Security Information, Official Duty Telephone Phone, Organization, and Work E-mail Address.

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Individuals can object to the collection of their PII by not completing and submitting the information required.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No
