Item	Description	Data Source
Contractor Management	Provides visibility of the number and citizenship type of contractor personnel deployed across the AOR. It allows users to evaluate the impact of CTR personnel on authorized government services (i.e., food, lodging) and is intended to improve planning factors.	SPOT-ES
Emergent Requirements	Provides visibility of requirements and status across the AOR. It allows users to query and analyze requirements with significant mission impact and ensure supportability and improve coordination of sourcing.	cASM
Awarded Procurements	Provides visibility of DoD and other US Government contract spending in the AOR. It allows users to query and summarize contract activity in a variety of ways to evaluate the impact of contract spend on budget factors and improve overall visibility and planning for contracted capabilities in the AOR.	FPDS-NG via AGCS
