Value Proposition Questions		
1. What is the problem your company solves? Why is it hard? What is your product/solution/service trying to do? Articulate your objectives using no jargon.		
2. How is it done today? What are the limitations of current approaches?		
3. What's new about your approach? Why do you think it will be successful?		
4. If you're successful, what difference will your product/solution make? What impact will success have? How will it be measured?		
5. What are the risks and the payoffs of your product/solution?		
6. Is there a Department of Defense requirement for your product/service?		
7. Has your company presented this product/service to anyone else within DISA? If yes, provide background on when and with whom?
