Defense Collaboration Services (DCS)

Overview

Defense Collaboration Services (DCS) delivers a suite of reliable, secure, and cost-effective collaboration capabilities to Department of Defense (DoD) Enterprise users. The DCS suite of capabilities is accessible to all DoD personnel on the Non-Secure Internet Protocol Router (NIPR) network with a Common Access Card (CAC) and on the Secure Internet Protocol Router (SIPR) network with a SIPR token. DCS Web Conference supports guest users for web conference sessions hosted by DoD users. The DCS-NIPR suite is also accessible from the internet.

DCS Capability Suite

Web Conference

- ❑ **Presentations:** Session presenters can display presentations and documents to meeting participants.
- ❑ **Voice Conferencing:** Users from commercial telephone or Defense Switch Network (DSN) can call into sessions.
- ❑ **Integrated Voice:** Users can use headphones and/or speakers from their laptops to participate in sessions.
- ❑ **Web Conference Recordings:** Session moderators can record session's access and share recordings for 180 days.
- ❑ **Desktop Sharing:** Presenters can share desktop with participants.
- ❑ **Multi-user Whiteboard:** Multiple users can highlight or mark items within presentation or blank whiteboard.
- ❑ **Polling and Voting:** Meeting presenters can create polls and receive real time results from users.
- ❑ **Closed Captioning:** Organizations can provide a stenographer to caption sessions for hearing impaired users.

Defense Collaboration Services (DCS)

Collaboration Portal

- ❑ **Social Media Platform:** Keeps users up-to-date with the latest information pertaining to DCS and provides links to useful information and resources.
- ❑ **Conference Management:** Allows users to create and manage web conference reservations and provides the capability for reservation owners to access and share web conference session recordings.
- ❑ **Service Status and System Check:** Displays overall service status and provides capability for users to check their workstations and networks ability to successfully connect to DCS.

XMPP Chat

- ❑ **XMPP Desktop Chat Client (Swift):** XMPP based chat client that will allow users to communicate with other enterprise chat users.
- ❑ **DCS Messenger:** Mobile application that allows mobile users to send chat messages to DCS XMPP Desktop Chat Client and Transverse chat client users.

Collaboration Capabilities Achieved

- ✓ Web-conference capability increasing productivity for your workforce while lowering travel costs to meetings.
- ✓ Chat capability connecting DoD enterprise users across desktop workstations and mobile devices.
- ✓ Internet accessible, allowing your workforce to include non-DoD users in web-conference sessions.
