# Defense Enterprise Office Solution

Globally Available, Flexible Adoption, Secure and Mission Effective.

**DEOS enables users across DoD to seamlessly collaborate and share information across the department regardless of organizational alignment or location.**

It is the DoD-wide single, enterprise commercial cloud solution for common communication, collaboration and productivity. DEOS is a commercially provided, cloud-based enterprise service that will seamlessly integrate email, content management, web conferencing, native audio, native video, chat and office productivity tools. DEOS is tightly secured to meet the Department of Defense's needs and available to a multitude of agencies within DoD. DEOS will be deployed on secure, globally-distributed networks to ensure access for warfighters.
