

# DISA SERVICES COURSE

Overview of DISA Services, Infrastructure, Processes, Policies and Support

January 2023

## Course Overview

This course is designed to help military departments and defense and federal agencies optimize their use of Defense Information Systems Agency services. DISA services are major components of the DOD Information Network and building blocks for the Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance support to the nation's warfighters.

DISA services – such as cloud services, classified and unclassified mobility, command and control, and cybersecurity – rely on a robust network infrastructure. DISA is committed to providing a protected and survivable global enterprise infrastructure that supports crucial information-sharing capabilities. Joint warfighters, national level leaders, and other mission and coalition partners depend on DISA services to communicate and transfer vital information around the world every day.

There is no charge to attend the course.

A CAC/PIV is required.

## The course will answer:

- What is DISA, and what services does DISA offer?
- How can DISA help you with services such as cloud, mobility and security?
- How do these services work and what can you expect from them now and in the future?
- How do you acquire DISA services?
- What is the DOD Information Network and where and how does your network fit in?
- What are the missions of DISA and Joint Force Headquarters – DODIN?
- Who is responsible for what, and what policies must DISA and customers follow?
- Will you be disconnected if your Authority To Connect expires?
- Where to go for information? support? other resources?

## FY23 Course Schedule

DOD CAC holders can register for any listed class.

Feb. 7-9 Online, 8 a.m.-2 p.m. PST

May 9-11 Online, 9 a.m.-3 p.m. EDT

Both In-Person and Online classes are planned for FY23  
Schedule to be updated as classes are confirmed

# Course Topics

The course covers the following topic areas:

2022

Topic	Description
Overview	Overview of the DISA mission, organization, services and networks.
The DISN	Review of the transport infrastructure over which DISA services are provided and into which mission partner networks connect, including tactical connectivity and plans for the future.
Network Connections	Overview of the classified and unclassified IP networks and services including data, virtual private networks and content delivery.
Computing Services	Review of DISA's data center hosting options and cloud capabilities including Stratus, cloud services support, cloud security and cloud storage.
DISA Services Support	Discussion of the organizations, processes and resources available to assist DISA's mission partners including customer support, ticket escalation, testing and cost recovery.
Collaboration Services	Overview of services that enable collaboration including enterprise services, Office 365, mobility, voice and video services.
Get Connected!	Review of the processes involved in circuit and service acquisition from requirements definition to disconnection. Outline of requirements/authorizations needed to connect to DISA networks.
Cybersecurity	Discussion of the tools, techniques and organizations that help secure the DODIN networks, and overview of cybersecurity services available to mission partners.
DISA Operations	Overview of organizations that operate and assure portions of the DODIN including DISA networks and services, authorized service interruptions, and the role of Node Site Coordinators.
Resources	Websites, phone numbers, email addresses, web portals, brochures, fact sheets, required regulations and acronyms.

## Participant Feedback

Below are comments from participants who have attended the online class.

*"The course is well structured, the trainers are very competent, and everybody will find something that they need to perform their mission."*

NORTHCOM, attended class online

*"I enjoyed the course. Very informative, shows changes in policy, technology and terminology."*

Attended class in Peterson AFB, Colorado

*"Suggest anyone who works on the watch floor take this class...I was on the floor for years, this class would have been a great help early on. Great job linking things together in the 'big picture.'"*

Cyber Operations, attended class online

*"[This course is] absolutely foundational to understanding the environment my team works in as cyberspace defenders."*

USCYBERCOM, attended in Fort Meade, Maryland

*"This course provides a lot of valuable information on what services DISA provides, how your organization can benefit, and how to get started."*

Army, attended class online

*"I thought I wouldn't like the virtual class, but it's actually turned out much better and really prefer the virtual class since we can ask questions via chat and receive answers in real time."*

Navy, attended class online
