

DISA Enterprise Voice Services (EVS)

DISA offers an array of unified capability offerings for unclassified and classified Voice Services

WHAT is Enterprise Voice Services? DISA's Enterprise Voice Services provides the Department of Defense with Enterprise Voice Solutions for combatant commands, services and agencies.

WHO should use Enterprise Voice Services? DoD combatant commands, services, agencies and their mission partners are looking to reduce or eliminate telecom and voice services costs and security vulnerabilities for sustaining local services, legacy voice systems, primary rate interface circuits and call processor hardware and software.

WHY Enterprise Voice Services? DISA delivers unclassified and classified IP-based voice capabilities in an "as-a-service" model to mission partners.

- Provides reliable, cost effective and secure communications.
- Enables mission partners to decommission legacy voice equipment and reduce hardware footprint and costs.
- Provides a global, scalable, redundant communications solution delivered over a highly available secure networks.

Voice Internet Service Provider (VISP)

What is VISP? DISA's VISP solution provides access to the public switched telephone network for unclassified calling to the commercial telephone network. It provides low per-call, per-minute rates for enterprise and local calls.

Mandated by DoD CIO all components are tasked to develop a network modernization and convergence plan to address the phase out of low speed time division multiplexing and eliminate all non-internet protocol network technologies by fiscal year 2023.

Enterprise Voice Services

IP-enabled Local Session Controller (LSC)
SIP-capable Session Border Controller (SBC)

YOU'RE READY FOR VISP

Voice Over Secure IP (VoSIP)

What is VoSIP? DISA's VoSIP solution provides and IP-based classified telecommunications network for collaboration with coalition partners and intelligence communities using SIP-based technologies.

Enterprise Voice over IP (EVoIP)

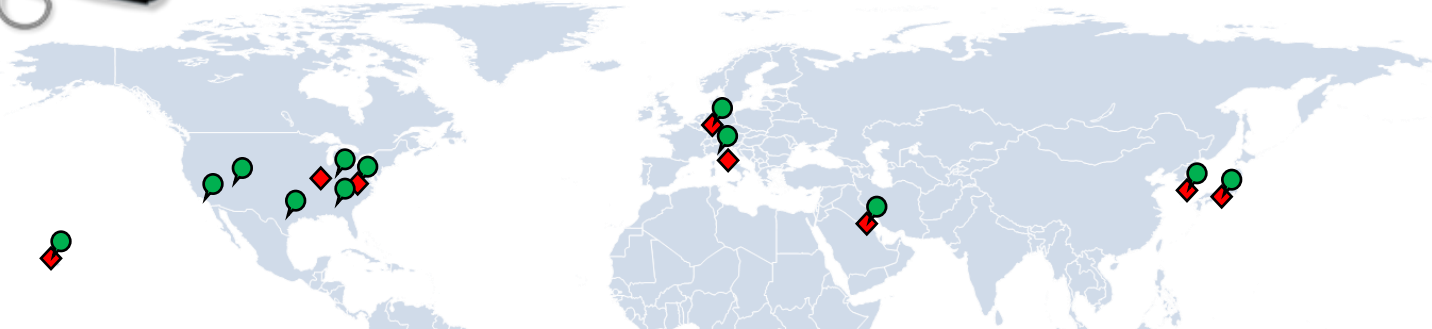

What is **EVoIP**? DISA's EVoIP solution provides on premise line-side services for hard phones and soft clients using unclassified Voice over IP services with access to enhanced calling features from the DISN via Enterprise Session Controllers.

EVoIP Features

- ▣ Soft client: voice, peer to peer, video, Instant Messaging and Presence, office integration, visual, Virtual Machine
