Defense Collaboration Services (DCS) Mobile Chat Capability

Overview: The Defense Collaboration Services (DCS) **browser-based mobile chat capability** is available to Department of Defense (DOD) mobile device users. This mobile chat capability supports DOD's strategic goal of delivering mobile services to the warfighters to **communicate anytime, anywhere**.

DCS mobile chat allows Purebred-enabled mobile device users to chat with DCS desktop chat users (e.g. Swift). This capability has the same features as the desktop chat service such as one-to-one and multi-user chat capabilities.

Mobile chat features include:

Chat window.
Roster.
Bookmarked rooms.
Join rooms.
Create room.
Multi-user room.
Presence indicator.

To access DCS Mobile Chat Capability from a Purebred-enabled mobile device go to:
