milCloud® 2.0
Connecting DOD networks to on-site commercial cloud environments.

DISA's milCloud® portfolio includes an integrated suite of cloud-based infrastructure services. Connecting commercial cloud service offerings to Department of Defense (DOD) networks in a private deployment model, the solution provides mission partners the latest cloud technologies at competitive prices, with uncompromised performance.

Approved to support Impact Level 5 data, milCloud® 2.0 includes a central cloud portal, which provides real-time visibility, payment, and workload provisioning.

Workload Size	vCPU Example OS	Mem/GB Example OS	Hourly Rate
Micro VM	1	1	$0.046388
Small	1	2	$0.049663
Medium	2	4	$0.073119
Large	4	8	$0.120031
Extra-Large	8	16	$0.177688
XX-Large	16	32	$0.293001

Storage	Rate
Tier 1 Block Storage / GB Month	$0.26
Standard Daily Backup / GB Month	$0.02
On-Demand Backup/ GB Month	$0.02

- **Integrated:** Spin up accredited compute instances in an on-demand and mission tailored fashion.
- **Scalable:** Elastically deploy environments based on real-world events and application requirements.
- **Real-time:** Central portal for provisioning and management.

*Hourly/daily rates available.
**OS rates available for Windows, Red Hat, and CentOS.
