milCloud® 2.0: Financial Overview
Connecting DoD networks to on-site commercial cloud environments

DISA's milCloud® portfolio includes an integrated suite of cloud-based infrastructure services. Connecting commercial cloud service offerings to Department of Defense (DoD) networks in a private deployment model, the solution provides mission partners the latest cloud technologies at competitive prices, with uncompromised performance.

Approved to support Impact Level 5 data, milCloud® 2.0 includes a central cloud portal, which provides real-time visibility, payment, and workload provisioning.

Financial Overview

DoD mission partners may leverage multiple payment methods, including:

- Operation and Maintenance (O&M/Annual)
- Procurement (Multi-Year)
- Research, Development, Test & Evaluation (RDT&E/Multi-Year)
- Defense Working Capital Funds (DWCF/No-Year)

Adding funds to an account: place an amended order in the business portal for planned utilization and follow the portal instructions on how to process your funding document.

Underutilized funds: contact the DISA Customer Engagement Office; contact info can be found within the business portal account profile.

Inadequate funding: business portal will begin to send, "low balance notifications" two months prior to the burnout date. Notifications will continue to be sent out: one month, two weeks, and one week prior to funds expiring.

Current as of June 2018
